Designing and Building Chairs: The New Best of Fine ...

As it turns out, building a chair from scratch is actually not that difficult and you don't really need any kind of crafting experience to be successful in this task. You can start with something even simpler: a DIY stool. One with a woven leather seat like the one presented on sugarandcloth might interest you. To built it you need four wooden legs (there are no real restrictions on their shape or design), angled brackets, piping cord filler, faux leather and some cotton fabric.

Each chair has hand cut grooves on the inside edges of its seat frame as well as notches in the seat back. These grooves range from 1/2" wide to 1/8" wide. The mechanism works so that the pegs fit into the grooves of the chair one size bigger and slides into place so that the horizontal edge between the chair seat and back line up.
