An engine control unit (ECU), also commonly called an engine control module (ECM) or powertrain control module (PCM), is a type of electronic control unit that controls a series of actuators on an internal combustion engine to ensure optimal engine performance. It does this by reading values from a multitude of sensors within the engine bay, interpreting the data using multidimensional ...

Engine control unit - Wikipedia

The engine control module (ECU repair shop) sends out a signal to the ignition control module which in turn tells the spark plugs to ignite; ignition timing is also a key factor in this process. To take this even further, to improve engine performance and fuel the variable valve timing can sometimes be altered.
