The Ultimate Live Sound Survival Guide : Audio Issues
You will need a dual channel analyzer like Smaart, SATTlive, SysTune, Tuning Capture, RITA, Open Sound Meter, etc.. Here are the speakers we need to set up: (2) CQ-1 (wide coverage main), (2) 650-P (2x 18-inch sub) in an uncoupled symmetrical point destination array. It's your standard leftright mains situation (see diagram below).

Professional Sound System Setup In 15 Minutes
The cables used to connect components of a sound system have three wires (conductors), similar to the three prong plug used to supply power to grounded electrical equipment. The electrical circuit used to pass a signal between sound equipment is 'balanced'. This means that two of the three conductors are dedicated to carrying the 'hot' and 'cold' path for the circuit carrying the ...

Barak Shpiez has earned several degrees in composition, audio engineering, and electrical engineering. His music can be found on programming on MTV, The History Channel, and more. Barak has also worked for several concert venues running live sound and as an engineer for Line 6 and DTS.

A Live Soundman's Handbook for Small Venues – Pro Audio Files
Perform a quick sound check to set the microphone and speaker levels. Place mics 1-2" away for voices and 4 - 5" away from acoustic instruments. Rely on the acoustic sound of the performer and reinforce their sound with the PA system. Two main speakers provide wider coverage for larger spaces or audiences.

How to Set Up a PA System | Sweetwater
Seriously, this should go without saying, but in the rush of setting up for live sound, engineers often forget to reset the board between shows. As a result, many soundchecks and performances start off with serious frequency imbalances that could have been avoided if the engineer had just started with flat EQs. 2. Focus on the Mix

8 Essential EQ Tips for Live Sound | Sweetwater
Setup RTX Voice (instructions above). 2. Select RTX Voice (Speakers) as your speakers in the Sound Settings of Windows. 3. Open a video or recording with background noise (e.g. a YouTube video of an interview in the street). You can test the denoising by turning the background noise removal on and off on RTX Voice (Speaker path) and listening to the difference it makes to the audio.
