Performance Engineers work hand in hand with the Application Architects and DevOps Teams. In the case of performance problems optimization steps must be executed live in production. Worst case scenario would be to rollback a deployment, however, thanks to feature flags and canary releases, the time it takes and that involved risk is minimized.

Trades of a Performance Engineer in 2020! | Dynatrace blog
Performance—responsiveness and scalability—is a make-or-break quality for software. Software Performance Engineering (SPE) provides a systematic, quantitative approach to constructing software systems that meet performance objectives.It prescribes ways to build performance into new systems rather than try to fix them later.
